\$31,690 save over \$6,000

Michael Finlay addressing IO Marine Technicians

Internal Service Training

Yamaha Motors have recently brought out new models of engines, and it is our job here at In & Outboard Marine to ensure we keep up to date with the latest in service information and techniques.

It is just as important to ensure the knowledge from those who are experienced in the field is passed on.

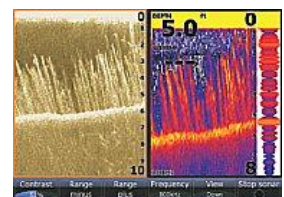

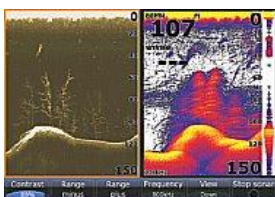

One way to do this is through regular workshop conversations where more experienced hands are able to pass on their knowledge to the new workers. Together they discuss the optimum way to complete jobs and work through any problems they may come across. These informal talks occur either during service meetings, set internal training times or as the picture above demonstrates, in the workshop throughout the day. They ensure the free flow of information, ideas and help to build the knowledge base of all.

With over 150 years of combined knowledge, please do not hesitate to contact our friendly service team directly on 89 240 210 if you have any questions.

We would like to welcome Maria Moukaddem to the role of Administration Assistant. She will be working with Lyn in our Accounts department. Maria, welcome to In & Outboard Marine!

Spare Parts Department - Exciting Upgrade for all HDS owners

Now back in stock is the Lowrance LSS1 structure scan this is an extra transducer and digital processor that enables your existing HDS unit to give a true to life image of the bottom, it will also look to the left and right up to 150 metres depending on the depth of the water.

Please come and see us in the store about adding this exciting feature to your HDS.
