

Service Department

The dry season is upon us and with it comes an increase in our boating activity! Here in the Top End it is important to ensure your day on the water is going to be a pleasant experience by having your motor serviced regularly. With our Darwin climate, we deal with different issues than our boating friends down south, including:

- ❖ Fuel going off quickly - stale fuel causes blockages in carbies jets
- ❖ Fuel tanks left half empty can have a condensation problem and in turn this can cause water in fuel
- ❖ Warm temperatures causes the rubber/plastic to harden and hard fuel lines and primer bulbs can cause air leaks which can cause fuel starvation problems
- ❖ Motor sitting for long periods need to have water pump impellers check as hard or bent impeller blades can break and over heat motors
- ❖ Never store your boat with the boat cover on as the moisture that is trapped will cause everything to sweat, accelerating oxidization off the aluminum, causing the paint to bubble and flake.

Contact our helpful Service team directly on 89 240 210 and book a service today! In & Outboard Marine can ensure your day out on the water is a good one by keeping your boat and motor in check - catching the fish though, is up to you!

Come in and check out our Electronics Bay! There you will find the latest **Platinum Plus** cards for our Lowrance sounders.

SAFETY MESSAGE

Here at In & Outboard Marine we strive to maintain Occupational Health & Safety Standards for the benefit of our staff and customers. To achieve these standards, Christine Sunitsch, our Service Admin, has picked up the role and is working alongside Paul Jensen to continue maintaining and improving safety around the workplace.
