

Service Department

In & Outboard Marine's Service Centre strive to give our customers the best marine service in the Northern Territory. We are proud to say that In & Outboard Marine's very own Service Manager, Michael Finlay, recently travelled to Brisbane to take part in the Yamaha Technician Grand Prix as a finalist. Out of the initial 100 competitors, it had been narrowed down to the top 8 technician's for Australia and New Zealand.

Michael worked and studied hard for this and after a close competition involving four practical tests, a customer service scenario that was taken from a real life event, followed by a two hour theory exam which included using Yamaha's service portal to order parts and find 'service bulletins', Michael was pipped at the post but is very pleased with the title of Runner Up 2011!

To maintain our impeccable service, we ensure that regular training is undertaken. As with all the staff in our Service Centre, Michael takes part in this training, keeping up to date and 'hands on' with the latest motors and technology as Yamaha keeps astride of the boating market. With all of this we can continue to offer the best for all our customers.

Michael, from everyone here at In & Outboard Marine, we would like to say a big congratulations for all your hard work!

To book your boat or motor in for a service, please call Christine or Tegan in the Service Department – Ph: (08) 89 240 210 or Email: service.admin@iomarine.com

Managing Director of Yamaha Motor Australia Mr. Isaac Otani presenting Michael Finlay with his trophy

YAMAHA **WaveRunner** **VX DELUXE**

LIMITED OFFER! Come into our air-conditioned showroom & check out the superseded Yamaha VX Deluxe model, packed with features!

The Deluxe reverse seat is contoured for three passengers, with a pair of gently raised bolsters to enhance driver/passenger comfort and security. The extended rear deck makes it very convenient for the user to climb on and off, or get ready for their next ski. A waterproof glove box - complete with foam cup holders - is the ideal place to store your phone & keys while out on the water. The 'Security Mode/Low RPM Mode' means you can easily reduce top speed and RPMs, a function ideal for learners. The push of button gives you the ability to disable the ignition, preventing an accidental start-up or an unauthorised joyride.

This Wave Runner can hold up to 60 litres of fuel & can pull skiers, tubes & wake boarders with ease. It's a great option for a starter ski, while still getting the thrill & exhilaration of that 'speedster' feeling!

Comes on a Redco Trailer with MAG wheels, giving you the total package - hurry, only 1 left! Yamaha Marine Finance is available TAP.

Only \$14,995*! **SAVE \$2,430!**
